

## Global Initiative on Disaster Risk Management

**Generate added value** by advocating for new and supporting existing partnerships “**Made in and with Germany**” for comprehensive disaster and climate risk management across countries and regions.

- **Taking a whole of government approach** bringing together key ministries and its respective federal agencies
- **Cluster German DRM expertise, services and technologies** from civil society, academia, public and **private sector**
- **Linking German and Global DRM solutions** by facilitating knowledge exchanges, transfers, networking, joint learning and innovation
- **Foster partnerships of mutual interest** developing tangible “products” that can easily be implemented, up-scaled and replicated
- Support and extend presence in relevant global and **regional DRM networks**, initiatives and exchange formats

## GIDRM priority working areas

By **leveraging** each stakeholder's comparative advantages, the Global Initiative focusses on three priority working areas:

- **Disaster Response Preparedness and Civil Protection**
- **Resilient Critical Infrastructure and Risk-sensitive Economic Cycles**
- **Effective Early Warning Systems**

**=> Tangible solutions for disaster resilience in metropolitan regions and urban areas are a priority**
